Narrowing Your Search

You can narrow your search by words or by date. Below you will find how to narrow your search by words under A, and by date under B.

A. By Words

A screenshot of a search interface. At the top, it says "Search For". Below that is a search bar containing the text "Find people AND places AND events" and a plus-minus sign. A dropdown menu is open, showing four options: "All Of The Words", "Exact Phrase", "Any Of The Words", and "None Of The Words". To the right of the search bar, there is a date "12/31/2011" with a calendar icon, a search icon, and a "Discover" button with a magnifying glass icon.

The search bar image shown above is to narrow your search. The main feature of the search bar is the option to choose how you search for terms. The choices are:

-**All Of The Words**, which means all of the words you search will be found on one page of the newspaper, but not necessarily in order or together. For example, if you search for Ogden Library the results will have Ogden and Library on the page, but not necessarily in the same article.

-**Exact Phrase**, which would be all of your search terms exactly how you typed them. So, if you were searching for William B. Ogden Free Library, only articles with the full library title would come up.

-**Any Of The Words**, which means the results will show any newspaper that has one or all of the words you searched for. For example, a search for Ogden Library, may find a paper that has Library, but no mention of Ogden.

-**None Of The Words**, which can be used to enter a term that you do not want found.

You can search for multiple terms by clicking on the plus sign at the right side of the search box.

B. By Date

The screenshot shows a search interface with a search bar containing the text "Find people AND places AND events". Below the search bar, there is a date range filter set to "Between 01/01/1856 And 12/31/2011". A dropdown menu is open, showing options: "Between", "On", "Before", and "After". A "Discover" button is visible to the right of the date range filter.

The other search box option is choosing a date range. This can be helpful if you know what year or month you are looking for, but not an exact print date.

Navigating the Search Result Page

Below is the result page of a search for Lewis E Steele. My search term is highlighted in blue within the transcript for each article. NOTE: Some of the transcripts can look a bit garbled, which is due to technology not being able to read the old copies of the newspapers clearly. To view the article as it appears on the newspaper page, click on the title of the newspaper at the top of the result.
